

Send These Pre-Made Messages To Your Prospects:

NOTE: You don't want your messages to come off like you're a company etc. So we recommend creating an "EMAIL" with your real name. You want everything to be and come off natural.

PRE-MADE SWIPE:

1. Seen your ad I'm happy to support you. Give me a call on my cell **(Your Phone Number)**. *****Feel free to add any of your credentials***** such as your expert areas etc.

Then finish it off with
Looking to hear from you.
(YOUR NAME)

Reply –

NOTE: if they reply with (no you call me) reply with this swipe.

Sounds good! I'm happy to give you a call. What's time to speak?

NOTE: Setting up a time and date comes off really professional and makes you look organized and serious.

SECOND NOTE: If they reply with someone has taken the spot, we have someone, Not interested. You want to make sure to reply with something that will interest them, and this could be anything.
Training, tutorials, 1 on 1 consultations etc.

Craigslist doesn't have a way to see demographics etc. BUT! They do have search Patterns you can enter in their search engine to pull endless amounts of information. People (Looking to buy) or seeking help with a variety of things. We urge you to go after 1 market at a time. "DO NOT" go after several at 1 time. **You will not generate any calls this way.**

WARNING: Make sure you include your REAL number in emails so they can call You direct (800) numbers won't work.

ENJOY!
Guillermo Mata
